

## Parnassus v5.0 release notes September 2017

### New Feature/Improvement

TFS Number	Title	Additional Detail (where needed)
3684	Refresh the look of the Parnassus screens	Changes to the look and feel of the screens
N/a	Changes to Centre, Sites and Contact screens	The Centre, Site and Contact screens have been rewritten to improve usability - please refer to separate documentation
3333	Restrict Direct Import Mode to certain sites	Added new field entitled "Prevent RegistrationDirectImport" at site level (only visible if Registration Direct Import Mode is enabled). When the Prevent Registration Direct Import mode is checked on the site, registration files will be held in stage 2 for AO approval.
3382	Prevent Learner Data being shared to third parties	A 'Prevent Learner Data being shared to third parties' has been added to the learner screen. This field is only for informatin and has no functionality behind it. Updating is via the Parnassus screen.
3459 & 3460	Additional AO Fields added at Site level	Added three new fields with dropdown values against site: AO Country, AO Region, AO Category
3498	Mandatory PO at Site level	The validation behind the existing 'Mandatory PO' checkbox on the site screen has been modified to work with Core Parnassus validation (rather than custom stored procedures as previously). Checking the 'Mandatory PO' checkbox on the site screen will make a PO a mandatory requirement when: Registration Import (by registration file) Grade Entry Import (by file) Certificate reprints Same site transfers (but not qualification sets) Cross site transfers (but not qualification sets)
3520	Venues added to Parnassus	Venues are a place where exams take place. Venues can be created and linked to a centre or centres. Venues are hidden by default
3549	Changes to Gender field values	Changes made to add 'Not Supplied' for gender and allow genders list to be customisation on a per-customer basis, for example renaming core gender titles, or adding additional genders NB - where custom genders exist these will map to the appropriate 'Not Supplied' code when passing information to regulatory bodies.
3603	Qualification Study Mode	A new field has been added to the Learner Qualification Registration screen to record the Study mode e.g. Full-time, Part-time. The list of options is customisable on a per customer basis. The field can be populated via file registration upload, the UI (screen) or Service Layer
3617	Add ability to transfer qualification registration without transferring unit registrations where the unit is optional on the destination qualification / pathway	This option is controlled by a setting, the default for this is it is switched off, which means the transfer functionality behaves as it currently does. When the setting is switched on, if a unit is optional on the destination qualification / pathway, then any existing unit registrations on that unit from the original registration will not be transferred across
3659	Add Void flag against achievement	When a Unit assessment is flagged as void, the assessment should no longer count towards the qualification (it should be treated as though it's been deleted), but the assessment should still be recorded in Parnassus. This would be used when: <ul style="list-style-type: none"> <li>• A learner takes an assessment, but it is later discovered they should never have been eligible to take the exam in the first place, or;</li> <li>• Malpractice or a mistake is discovered that means the grade awarded should become void</li> </ul> NB once a unit assessment has been voided it is not possible to un-void it

## Parnassus v5.0 release notes September 2017

### New Feature/Improvement

TFS Number	Title	Additional Detail (where needed)
3513	Security settings lost	Issue fixed whereby control customisations would not be reloaded if the cache of those to apply was lost
3527	Assigning existing units to credit based qualifications	Fixed issue in assigning existing units to credit based qualifications
3571	Reset User Password when locked out	Previously when a user made three attempts at logging into Parnassus with an incorrect password the user was locked out, but unable to reset their password. A change has been made that allows the user to reset their password even if they are locked out
3668	Fix note appearance in Chrome	Long notes are now more easily readable in Chrome
3670	Fix Registration import file, editing a row	Fixed issue that prevented the saving of a registration import row after changing the qualification selected.
3671	Fix Qualset bug	Fix a problem with registrations import when the setting QualificationSet.ReRegisterOnExistingQualificationWhenComplete==true
3683	Ofqual report headings	Prevent translations from changing the Ofqual report headings
